Trend Micro Home Network Security version 6.6.604 and earlier is vulnerable to an iotcl stack-based buffer overflow vulnerability that could allow an attacker to .The issue results from a vulnerability in iotcl that allows remote arbitrary code execution on Trend Micro devices. Most Windows-enabled computers use Trend Micro's version of iotcl released in 2008. Since then, this version has been updated at least four times, but the vulnerability still exists. â€œTrend Micro is currently implementing all fixes for this vulnerability for all releases released since then. fffad4f19a
