Abstract: Ilm alamiah dasar is an Indonesian science that is developed in order to teach the local people. The Indonesian science used here is called ilmu alamiah dasar (ilm alamiah). It is a science that uses a learning system called ilmu pengetahuan alam. The learning system of alamiah that is used here is called alamiah dasar. Alamiah dasar is the science that includes the research of the flora and fauna of Indonesia. The learning system of alamiah that is used here is called alamiah dasar (ilm alamiah). It is an Indonesian science that is used in order to teach the local people. Its main purpose is to develop and to teach the children. The mQ: AttributeError:'module' object has no attribute 'utils' I am trying to extend base_user. I have created a utils.py file and imported it in the base_user.py file. I also created some methods in the utils file. base_user.py: import django from django.db import models from django.contrib.auth.models import AbstractBaseUser, BaseUserManager from.utils import * class PermissionsMixin(object): def get_user_permissions(self, obj): """ Returns a list of permission names for the given object (instance of User) """ return Permission.objects.filter(user__username__iexact=obj.username) class UserManager(BaseUserManager): """ Base User Manager. """ def create_user(self, username, email, password=None): if not email: raise ValueError("Users must have an email address") user = self.model(username=username, email=email, password=password
