Link: The system said: There was a problem starting the device driver interface (do not worry, your computer will run fine without it) Then I tried to remove Dell official XP audio driver for M1330. And the same problem I had before. Anyways, I restarted my PC and then I restarted my USB adapter,

---

then I rebooted my PC again and then my adapter and it worked. A: Somehow my internet connection is too slow to load the website. I had to wait for a few hours. Then the download completed and everything worked fine. Thank you! Q: Android running on google glass: wait for push notification? So this is what my question is: If I want to run an application on android on google glass If I want to run it on a non-paired android And I have an APK, how do I make the device automatically check for notifications when it starts? And the code that I have so far: private NotificationManager notificationManager; @Override public void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); Intent intent = new Intent(this, MainActivity.class); PendingIntent contentIntent = PendingIntent.getActivity(this, 0, intent, 0); Notification.Builder notification = new Notification.Builder(this) .setContentIntent(contentIntent) .setSmallIcon(R.mipmap.ic\_launcher) .setTitle("Hello") .setContentText("This is my notification!") .setAutoCancel(true); notificationManager = (NotificationManager) getSystemService(NOTIFICATION\_SERVICE); notification.setTicker("Here comes a notification!"); notification.setContentIntent(contentIntent); notificationManager.notify(2d92ce491b
