

---

KEYMACRO works by creating a macro for every copy of a text that you perform. It has the ability to automatically detect the pasted text, assign it to a given category, and automatically move the copied text to the right clipboard. UCRYSTAL Description: UCRYSTAL is the latest and most complete utility that aims to monitor and store the incoming clipboard text. It is a simple clipboard manager with the ability to automatically remove blank lines from the text, strip HTML tags, and insert a custom quote character whenever a text block is being quoted. OSCAP Description: OSCAP is an application that aims to make it easier to manipulate and export multiple documents, either manually or automatically, to different file formats. It is able to automate both data and text document conversions in order to save you the work and make you a copy of the original text. Shane McDonald January 23, 2019 Kana Clip Kana Clip is a small Windows application whose purpose is to help you store multiple clipboard text entries. The utility is able to process text and links. It cannot save images. Comes in a portable edition This is a portable program. You can take advantage of its portability status and run it on your system by opening the executable file (there's no setup included in the process). The tool does not store entries in your Windows registry so you can get rid of it by deleting the files that you have downloaded from the Internet. In addition, you can drop it on portable media devices and carry it with you. Unobtrusive running mode Kana Clip gives you the possibility to access its features via the system tray. You can easily start or stop the clipboard monitoring process and look for URLs. Each time you copy links to the clipboard, the application shows popup notifications asking you if you want to open the target URL. Store and insert clipboard snippets The program is able to automatically monitor and store clipboard data into its memory. In order to access the text entries saved to the clipboard, you need to make use of a hotkey. A list with all available options is automatically displayed in a popup panel. Other important options worth being mentioned enable you to flush or refresh the text clips, quote text, as well as strip HTML tags, blank lines, and leading/trailing spaces. A few configuration settings are implemented for helping you run the utility at Windows startup, specify the maximum number of clips, insert a custom quote character, and reassign hot 70238732e0
