The forced shutdown is a problem. Also to the Alienware people. Android Studio!!! I've been looking around and have not found anyone with the exact symptoms, including people with the exact model. I recently bought an Alienware Aurora R4 PC. Problems with Windows 10. 12/21/2017 12:08. Have any of you heard of a problem with the monitor? My Alienware Aurora monitors have a sync problem. 15/24/2017 12:56 PM. Alienware Desktop Shows Suspend/Resume Failed as Computer Quits. I'm using a Windows 7 laptop with 2GB of RAM, an Intel Core i3-2400 processor, a GeForce 550 graphics card, and an Intel SSD drive. I accidentally set the computer to hibernate instead of shutdown. Alienware On Dell If you're using all 16GB of RAM, then I think you're out of luck there. I ran Windows 10 disk cleanup and a couple of other clean-up commands. I also tried to reinstall Windows 7 with the "Custom" option and this option usually works well for me. If you have any questions about these options, I'm happy to help. Jan 31, 2015 Hi Guys, I'm facing the same issue. I have the same model and purchased it in 2014. I purchased it to convert it to SSD as I've heard this model can take huge advantage of SSD. But then I upgraded the hard disk from 7200 RPM to SSD (Bolston) A340 SATA 4.3". This method can also be used by you, if you bought a laptop with a HDD. What you need to do is to login to windows and run MSConfig, under the Startup tab, enable the Windows 7 (loader) entry, and set Windows 7 to "Run after Windows starts". Here are the steps to follow: 1) Open the Start menu, select Devices. (Powershell) Windows 7 AHCI Problem. I'm using a Dell G5 5587 laptop and facing high RAM usage 4.3 GB out of 8 GB as well as sluggish performance. I did a clean installation and it began to do all of this AFTER I installed Windows 7 Ultimate. A washer and dryer. I've posted this issue at MSI's thread here to request assistance. Here is a picture of my computer, I am turning my computer off. 0x000000d0 0x000000e0 0x000000e8. No I haven't 3ef4e8ef8d
