Easy to install and use Detects and records conversations Ming does not include any features or applications. For a reason, it's totally free to use. Your computer will need an internet connection in order to install and operate the software. If you need to set it up in your network, it is certainly possible to do so. If you want to do it manually, check out the manual below. But the best way to understand it and find out how to use the software is to watch the demo. What you should know about it:

MING Chat Monitor Home is the best software to spy chat It's free to use The software is easy to install and setup It can detect and record all chats from all online accounts It's the best software to spy on your kids Ming has to be the best IM program there is. No kidding it's the best one. So, why are all these other IM programs trying to copy it's design when they have the knowledge and skills to build their own program but they are not doing so. Do your kids really know their privacy settings? You can see if they are setting it up for themselves or if they really know it? Nowadays, kids

just use their iPads or smartphones. The Apps are just way too great to put it away and use it from computers. So, are you finding out about all the apps that are out there? You need to keep an eye on your kids and their Apps. There are some Apps out there that may be collecting all the information your kids provide. See if your kids understand and know what they are doing. It's easy enough to change these settings and maybe your kids will do it for themselves. This is just like any other place where you go to make sure everything is done right for you. So, if you are

going to be the parent, and it's all on your kids, then what are you doing about the Apps they are using? You really need to set them up in the right way so that you know what they are doing. The Apps will change and maybe they will mess up the settings so that you find out about it. You have to be a bit on the ball for this. If you are going to set it up the right way then the Apps will be just fine. If you are going to fudge it or put it on your kids, then they are going to be working on the wrong
