I don't have much experience converting shell script to Windows batch files, so I'm looking for someone that can help me with the conversion.

```
#!/bin/sh if [[ $(uname) = 'Linux' ]]; then echo "Running on Linux..." else echo "Running on Windows..." fi A: you can use this @if (@X)==(@Y) @end /* Usage: if CMD var==value [else if var==value]... */ @echo off setlocal if /i "%~1"==" /c" if not "%~2" == "" goto :eof if "%~1" neq "/" ( set "full_command=%~1" if "%full_command:~0,1%" == "/" set "full_command=%full_command:~1%" shift goto :skip_command ) call :convert "%~1" shift goto :eof
```

What's New In Monitor Registry Changes Software?

A utility to help you monitor the registry for changes. + - + == - + You can view all the changes to your Windows registry from here, also if you like, you can change the default settings and choose which directories to monitor. The easiest way to do this is to open the Setup Wizard, when you start the program. == Overview == A utility to help you monitor the registry for changes. + You can view all the changes to your Windows registry from here, also if you like, you can change the default settings and choose which directories to monitor. The easiest way to do this is to open the Setup Wizard, when you start the program. = Installation = = Installation = If you have the InstallShield Wizard, this is it. Right-click the Setup and select Run Setup. Or, right-click the Setup and select Install. If you have the InstallShield Wizard, this is it. Right-click the Setup and select Run Setup. Or, right-click the Setup and select Install. - - = Usage = - - == Computer Start-Up and Shutdown = - - When the computer starts up, Windows looks in the registry for its default settings. If Windows cannot find those settings, it begins monitoring the registry. If Windows cannot find those settings, it will first monitor the "Current User" registry. If that doesn't work, it will then monitor the "Local System" registry. If that doesn't work, it will finally monitor the "Default" registry. If none of these work, it will then stop monitoring, unless you set this program to monitor changes to this registry. If the program is already monitoring changes, then it will stop monitoring. - - = Monitoring the registry for changes = - - You can set the program to monitor changes to this registry at preset time intervals. You can also set the program to start monitoring when the computer starts up, or when the computer shuts down. To do this, open the Setup Wizard and set these options. - - == Defaults = - - You can set the program to monitor changes to this registry at preset time intervals. You can also set the program to start monitoring when the computer starts up, or when the computer shuts down. To do this, open the Setup Wizard and set these options. + The Settings screen in the Setup Wizard will allow you to choose which directories and events you want to monitor. - -

System Requirements:
