How can I force lint to see errors of the declared variable? A: When I test it in JSLint, it complains about the var s = 'test' syntax. It should be var s = 'test'; (note the semicolon at the end). You're also missing a function call: var f = s(); console.log(f); Q: FizzBuzz in Scala I've started to learn Scala and I'm currently trying to create a Scala version of FizzBuzz. I have written the code below, but it doesn't work. When I run the code and enter any input it returns a list of lists of integers, and it seems that they are all empty. scala> val numbers = (1 to 100).toList numbers: List[Int] = List() scala> numbers.map(s => if(s % 15 == 0) "FizzBuzz" else s) :10: error: value map is not a member of List[Int]
