EDM Email Sender is a professional Email Bulk Sender software that can send a large amount of email in batch. It can send email from unlimited email accounts simultaneously in a batch. And it is an ideal solution for those businessmen to send email with batch. Images Add photos Configure settings EDM Email Sender is a very powerful tool which allows you to send bulk emails from any address with just a few clicks. Clear-cut environment and input information The interface of the application consists of a standard window which is very easy to navigate through. To get started, you can write the email address and name of the sender. Since EDM Email Sender does not verify any parameters to make sure you are the owner of the respective email account, you can basically write anything (as long as it exists). Import items, switch body format and tweak other parameters Now you can mass import outgoing email addresses from a TXT or XLS file, as well as write the subject (optionally select your macro type - recipient's name, to email, random string etc.) and body. In addition, you can switch the body format from normal text to HTML. The latter option lets you make some changes to the font style, attributes and size, text color, and so on. Add attachments and save log files Furthermore, you can add an attachment to the email, enable MIME mode, as well as save a log file for success, failure and null. Before sending your email, you can preview it in the web browser, import email from the web or from a TXT file, edit proxy settings and configure advanced options (e.g. email delivery). A last evaluation The utility uses a very low amount of system resources, includes an online help file with snapshots and did not freeze or crash during our tests. It takes several seconds to send the email to only one account, so if you have a lot of destinations, the process may last some time.

All in all, EDM Email Sender is an excellent program for sending bulk emails and is simple to use, even by novices. We strongly recommend it.
