This new design also features a global menu bar and a dialog box instead of a menu. As well, an option has been added to automatically convert styles in older drawings. A new 'Map to Model' feature allows a feature to be relocated or dimensioned on a map, which can be integrated into CAD drawings. The latest AutoCAD release, 2010, has a completely new user interface with the ribbon at the top with most menu items and tools on the ribbon. A sub-ribbon containing toolbars containing most of the functionality (such as Home, Detail, Auto, Palette, and Utilities) is located on the right. A new 3D interface was introduced in AutoCAD 2010 and includes interactive panes, which are similar to the 2D panes in AutoCAD 2009. This is an outgrowth of the "LayOut" and "Revit" programs, which are presented as a design surface to which the user can lay out and annotate a 3D model. In AutoCAD LT 2010, the ribbon, Task panes, and the Edit tab have been replaced by a customization menu that can be customized to suit the user's needs. The customization menu a1d647c40b
