

Simple ID3-Tag Editor is an application with a pretty self-explanatory title - it allows you to edit the ID3 information of your audio tracks with the MP3 format. It can be easily used by individuals of any experience level, including novices. This is a portable software, so installing Simple ID3-Tag Editor is not necessary. It means that you can store the tool on a removable drive, plug it into any computer and directly run its executable file. What's more important is that your Windows registry keys will remain intact. The interface of Simple ID3-Tag Editor is based on a standard window in which you can use only the "drag and drop" method to import songs. Batch processing is allowed, meaning that you can add multiple files but you can edit only one at a time. So, the tool lets you change ID3v1 details (e.g. title, artist, album, comment) and ID3v2 information (e.g. composer, copyright, URL). But you can also enable the program to search subfolders and to remove ID3v1 or ID3v2 information, as well as play songs in the default media player and sort items by text, data or both. The simplistic software runs on a low-to-moderate amount of system resources, has a good response time and didn't freeze, crash or pop up errors during our testing. On the other hand, there is no help file available and you cannot change the program's behavior. But the biggest problem is that you cannot process multiple files at once. We recommend Simple ID3-Tag Editor with reservations. Why don't you add the ability to change ID3 tags while allowing the user to do so with multiple files at once? Especially if the files are not all the same size? I like the idea of the users being able to edit their own tags. Why don't you add the ability to change ID3 tags while allowing the user to do so with multiple files at once? Especially if the files are not all the same size? I like the idea of the users being able to edit their own tags. Gman, this program is not designed to edit ID3 tags. It only allows you to edit the text (and possibly the data) of ID3 tags of MP3 files. And since it is really a one-time use program, adding this feature is not an option.

What's New In Simple ID3-Tag Editor?

Software for changing the ID3-Tag information of audio tracks. In order to change the ID3-Tag information of audio tracks, it is necessary to be familiar with the structure of the audio file. It is recommended to have a basic knowledge of the MP3 format.

*Simple ID3-Tag Editor is able to read the ID3v1 and ID3v2 tag information from audio files. ID3v1 is the primary ID3-Tag and it is the most popular ID3-Tag used by the media players. ID3v2 is the enhanced version of the primary ID3-Tag ID3v1. ID3v2 is considered to be the standard ID3-Tag used by most of the applications. If you want to change only the ID3v1 information, simply drag and drop the song files to the program and press the "Edit ID3v1" button. To edit the ID3v2 information, drag and drop the file from the media player to the program and press the "Edit ID3v2" button. If you want to edit ID3v1 and ID3v2 information of audio files, drag and drop the files from the media player to the program and press the "Edit ID3v1 and ID3v2" button. *Press the "Quit" button to close the program. *If you want to exit from the program without changing the ID3 information of audio tracks, press the "Close" button. *To import a list of songs from a text file, use the "Import songs from file" button. *To play audio tracks, drag and drop the audio files from the media player to the program. The program displays the names of the files in the list of the playlists. *To create new playlists, drag and drop the audio files to the program. The program creates the playlists automatically. To create a playlist, drag and drop the audio files to the program and then press the "Create playlist" button. *To remove an audio file from the playlists, drag and drop the audio file from the playlist to the program. The program removes the file automatically. *To open a file in the default media player, use the "Open in default player" button. *To exit from the application, press the "Exit" button. *Use the "Settings" button to change program settings. *Use the "Help" button to get help. *Use the "About" button to get program info
