AutoCAD 2.0 was the first commercially available CAD program that supported three-dimensional (3D) design. The 2.0 release included an "electronic schematic" feature, which enabled users to draw schematics for mechanical and electrical parts, and other information that could be viewed and manipulated in three dimensions. AutoCAD 3D was the first application to display geometry in the 3D coordinate system, later known as the "w-axis" or world axis. AutoCAD released AutoCAD 3D in 1987, making it the first all-purpose CAD application to support 3D geometry. AutoCAD 3D allowed users to represent objects and features in three dimensions. AutoCAD LT, AutoCAD SE, and AutoCAD LT/SE allow limited use of the AutoCAD application. These are the AutoCAD applications available to students and faculty.Welcome to PizmoDev Fest About Welcome to PizmoDev Fest, a one day workshop for people interested in building their first PizD modules. During the day, you'll have the opportunity to see demonstrations on the PizD, look around a workshop, and learn about PizmoDev Fest. We'll also have an opportunity to chat with other developers about PizmoDev and how to get started with the PizD. Instructors The workshop is led by PizD founder Joe Cheesman, and will be run by PizD developer Keith Landrigan. Here are their bios: Joe Cheesman PizD is Joe's project to build an open source hardware platform, based on the AVR microcontroller, specifically the ATtiny13A. Joe is also the creator of a number of open source software projects, including the Arduino IDE, and the AmigaOS 4 core installer. Joe founded PizD, and has since grown the project to a self-sustaining team of international volunteers. Joe has been involved with microcontroller projects since the 1980s. He is particularly interested in those projects which use both hardware and software for unique and novel interaction with the physical world. Joe is a believer in the open source movement. He strongly believes that this movement will be the foundation of much of the technology which will shape the future. Keith Landrigan Keith is a software developer working on Pizmo

The new cover of GQ features a "cloned" Putin—moustache and all—printing out a Putin-like baby picture. "Watch out, world." "Where's Barack Obama?" "He's in the second row." "Wait, who's this?" The birth announcement: "Nikita Alexandrovich Putin." (The first name is spelled wrong.) The birth announcement promises a "medal-winning career" in sports and the military. "There's no way the world can fight its way back from Putin's totalitarian powers without enlisting the skills of a born leader," the announcement says. "Nikita Alexandrovich Putin, who'll just turn six next month, has the right stuff." The headline: "A president for the 21st century." GQ editor Will Dean told Ioffe he was "really honored" to feature Putin on the cover. "We asked ourselves, 'Who's the most iconic president in history? This guy," Dean said, holding up the magazine. "Everybody knows who he is, and he hasn 5b5f913d15
