This is an easy-to-use, lightweight software. It allows you to record short video clips of your PC screen for evidentiary purposes. The software provides a perfect scenario of a criminal attack. First, you can monitor your computer without being seen. You can also set up recording scenarios to capture a criminal attempt to access your PC, the screen of another user, or the screen of a broken computer. Also, you can capture and record a video of the desktop background in the case of the user leaving his computer unattended. In addition, the software allows you to hide system files for better protection of your data. However, all of your data remains completely safe. Furthermore, you can recover deleted files with the help of the software. The software supports various Windows screens: desktop, start menu, browser, etc. The recording is adjustable: you can save the

**What's New In SnapShot Pro?**

Snapshots are the only way to see what you are doing on your screen. Take a quick and

---

convenient snapshot of what you are doing. Say you are developing a new feature for your site, or you want to have a record of a live event. Snapshot an image, open it in a photo editor, crop it, and add a title and description, then save it for later. This is a very easy way to keep a record of a project or presentation for reference, or post it on a social network. Need to send a document, photo, or video as an email attachment? Snapshot it, open it, and select it in an email client. This is especially useful when working on a project in a collaborative environment. The original Snapshot Pro has been rewritten in C# and now is significantly faster and more powerful than the original Snapshot Pro. Rating: 6.0 12 March 2018 SnapaShot Pro is a  
great software. I'm using it for three years. I  
wish it would be more popular. It is easy-to-  
use and has many features. I don't have a  
problem with the UI. Also, it is a great  
alternative to Adobe Acrobat Pro. View more
