Save time! This application saves you time by automatically creating rental invoices and calculating the taxes and charges for you! The application creates and delivers an invoice to the tenant for the current rent period. If you can see that the last payment has been refused, you can send the invoice to a new account to prevent future problems. You can generate and print invoices that include all taxes and charges. Please be informed that after sending the invoice you have to wait 2 weeks to receive a returned check, the payment. You have to enter the payment information as follows: In the Invoice Entry window: 1. Enter the check number (payable to "TAMCO"). 2. If the Check has been issued, the amount of the check is automatically calculated. 3. If the Check has been returned, a new check number is generated. 4. The Return Check window opens. Enter the Check Number (payable to "TAMCO"). 5. If the Check has been cleared, you can print the cleared check. 6. If the Check has been returned, enter the return number and print it. 7. The Amount of the Check is automatically calculated. If an amount is not accepted, you can change the amount in the Invoice Entry window by entering a new amount and clicking "Update". This operation affects only the current invoice. You can enter the following payment method: 1. Purchasing a check via our bank account (with the account number and bank name provided by your bank). 2. Deposit check into our bank account via e-mail. 3. Enter a check number for a bank check, for which the payment information is already available (payable to "TAMCO"). 4
